The purpose of this meeting is to inform participants about water quality in Carters and Burton Creeks in Central Brazos County and the total maximum daily load (TMDL) Process in Texas. Topics discussed will include a general overview of watersheds, water quality and bacteria; the requirements, process and anticipated outcomes of developing and implementing a TMDL for *E. coli*; and the process that will be employed in the Carters Creek and Burton Creek watersheds. Additionally, representatives of the TCEQ will present information regarding TMDLs, progress to date on the Carters and Burton TMDL and a TIAER representative will present information on the preliminary TMDL analysis of the creeks. A path forward will conclude the meeting.

**MEETING AGENDA**

2:30 – Introductions  (Lucas Gregory, TWRI)

2:40 – Watersheds, Water Quality and Bacteria  (Lucas Gregory, TWRI)

3:15 – Explanation of the TMDL Process  (TCEQ Staff)

3:30 – Project Progress  (TCEQ Staff)

3:45 – Watershed Findings  (Larry Hauck, TIAER)

4:20 – Implementation Process and Next Steps  (Lucas Gregory, TWRI)

4:30 – Adjourn Meeting
